

Hearing Protection

Earmuffs

- Useful in moderate to loud noise
- Easy to put on and take off, adjusts to different head sizes
- Come in low profile and high visibility styles
- Use electronic earmuffs when communication is required in noisy places

Banded Earplugs

- Can be worn with the band over the head, behind the neck or under the chin
- Easy to put on and take off, when going in and out of low to moderate noise

Solid custom-molded Earplugs

- Custom made for individual
- Used for blocking moderate to loud noises
- Also used as swim plugs

Musician's Earplugs

- Custom made for individual
- Have special filter providing a "flat" frequency response so music and speech sound softer, but not muffled
- Different filter reduction available

Disposable Foam Earplugs

- Useful in moderate to very loud noise
- Most are rolled down before insertion; others are simply pushed into the ear canal
- Available with and without neck cords

Electronic Hearing Protection

- Available in instant fit and custom molded
- Hearing protection and enhancement devices
- Amplify sounds
- Deliver natural wind reduction and superior all-digital sound quality
- Rechargeable
- Great for hunting and high noise jobs

Safe Listening Earbuds

- Available in bluetooth and corded styles
- Built with a responsible max listening volume of 85dB, these earbuds keep kids' ears safe during longer listening sessions
